

Greetings from Cynthia Anthony

Greetings to you from your beloved child Cynthia Anthony. I am fine here by the grace of God and by your daily prayer. And I hope the same with you.

This year I'm studying in PUC II year. I have taken physics, Chemistry, Mathematics and Biology. I am very much interested in Biology. Recently my midterm Examination are completed. I did well. I also participate in cultural activities conducted by our college. In the month of May we have CET/NEET exams. So I am working hard to get merit seat.

As this is a Christmas season we all are getting ready for the celebration. I enjoy decorating the house making the crib in an innovative way and preparing sweets

All our family members get together for celebration for this holy and memorable day.

I and my parents are very special and thankful for your unconditional support and help to continue my studies. Everyday we remember you in our prayer.

Wishing you all a joyous and cheerful Christmas and a prosperous New year. May the brightness and happiness of this season fill your coming year with beautiful moments of joy for you.

Yours loving  
Cynthia Anthony.
